DIAMONDBACK DOES IT YOUR WAY

*D*iamondback Fitness, one of America's leading manufacturers of feature-packed, high-value fitness equipment, offers you a choice of cardio equipment so that you can customize your

workout. Now you can do it your way in the comfort of your own home. With our 30 years as innovative leaders in the fitness and bicycle industries, we are well on our way to becoming the dominant force in full-line cardio equipment for home and light institutional use. We've made it to the top by offering dramatic styling, complete reliability, advanced technology and extreme comfort . . . all at the best value-pricing in the industry. We are proud to offer a full-line of fitness equipment — so you can do it your way — any day, any time.

Diamondback has an unmatched track record for experience and performance. We've been a leader in the biking industry for 120 years. Our Diamondback and Raleigh bikes have set new standards in the industry and earned us a reputation for integrity. Diamondback's heritage of quality, hassle-free service and competitive value don't just set us apart — they put us ahead.

Today, Diamondback Fitness designs and manufactures a full-line of premium cardio-fitness equipment, including Treadmills, Elliptical Trainers, Recumbent Bikes, Upright Bikes and Steppers. All of our products are created with an unrelenting commitment to style, state-of-the-art technology, durability, performance and an attention to detail that's second to none.

You can trust Diamondback as your one-stop source for the best value in home and light institutional use equipment. Exciting new advances and products are being introduced each year. We are a brand dedicated to improving the fitness and well-being of our customers, now and in the future. We believe our care, pride and pursuit of excellence will enable us to continue to provide innovative fitness solutions and the highest rate of customer satisfaction. That's how we are doing it your way!

. . . HOUSES

*D*iamondback has a full line of feature- and value-packed treadmills. The 400Tm, 500Tm, 600Tm, 700Tm and 750Tm are chock-full of new product advances including a new color palette based on today's leading color trends. The designs are dramatic, the technology is state-of-the-art, and the value is undisputed.

Our 400Tm offers a well-rounded workout for the budget-minded, while our 500Tm model provides a wide array of the most-wanted features like HR Control programs, 6 presets and a 5-window display. All at a killer price. Our 600Tm offers even more perks, including 8 presets and 4 HR programs. Our top-of-the-line 700Tm and 750Tm are the first treadmills created and marketed with women in mind. Programs include 10 preset programs and one-touch buttons for objectives like "thigh burning" or "glute toning." A special Cardio Coach Assistant program allows you to select special weight loss programs or use the "training assistant" mode to help you train for a 5K or 10K charity run. This amazing treadmill technology will be just as attractive and beneficial to both men and women. We did it your way!

It took us years to perfect and introduce a complete treadmill line. It was worth the wait. Now, it's catapulting us into the forefront as the full-line cardio supplier with exceptional value.

Our ellipticals are miles ahead in technology, design, and value. Our low impact models create one of the most natural upper and lower body motions in today's cross-trainers. We offer all the most wanted features like hands-free heart-rate controls, varied levels of resistance and every possible ergonomic comfort and convenience. The smooth, natural leg stride and push/pull arm action is optimum for sculpting legs, strengthening arms and improving overall body tone. Elliptical machines have become one of the most popular cardiovascular machines because they provide a low-impact alternative to walking and running.

For low impact, highly efficient cardio and muscle toning, our Award-Winning recumbent line will have you sitting in the lap of luxury while riding your way to fitness. Our outstanding line of recumbent bikes provide the comfort of our exclusive Comfort-Plus® extra-wide seat, and the stability of a molded backrest. This less aggressive cycling position lets you enjoy an extra degree of comfort, as well. Our bikes offer the most sought-after features on the market, like hands-free heart-rate controls, varied levels of resistance and easy entry and exit of the bike. It's easy to see that we did it your way.

"As a former pro athlete of 15 + years, my body has been put thru the test, trust me. Astro turf, long seasons and all the rest. Up 'til now, I have yet to find a machine to accommodate my 6'6" – 300lb. frame due to lack of durability or space to get a complete workout. Friends, if you are a larger man and hate being cramped or worried the machine will collapse under you.....it's your birthday. Diamondback Fitness has invented a machine with us in mind. Big, strong, durable — and it took all I could give it and kept standing. I was sore after the workout for the right reasons, not from being cramped up or holding back for fear of breaking the machine (which has happened). The bike can take it all and keep on ticking! You can keep her in your room and almost anywhere else as it is completely portable. Finally a machine as tough as nails for all of us!"

—Brad "Animal" Lesley

Bradley Jay Lesley, former Major League Baseball pitcher for the Cincinnati Reds and Milwaukee Brewers.

Our Award-Winning Upright Bikes are a beautiful expression of form and function for intensive, low-impact aerobics. These bikes offer the kind of easy adjustability and pedal placement that's crucial for comfort and maximizing your workout. Our precisely padded seat is ergonomically configured to disperse your weight evenly and has flexible panels to reduce pressure and eliminate numbness. Other features like a hands-free heart-rate control and easy to read console with multi-intensity level programs make these excellent alternative's for cross-training.
